

PointSampler/include
/point_sampler/jittered
_grid.hpp

```
graph TD; A["PointSampler/include /point_sampler/jittered_grid.hpp"] <--> B["PointSampler/include /point_sampler/importance_resampling.hpp"]; B <--> C["PointSampler/include /point_sampler.hpp"]; C <--> A;
```

The diagram illustrates the include relationships between three header files in the PointSampler directory. The files are arranged in a triangle, with each file including the other two, as indicated by the double-headed blue arrows. The top file is 'PointSampler/include /point_sampler/jittered_grid.hpp', the middle file is 'PointSampler/include /point_sampler/importance_resampling.hpp', and the bottom file is 'PointSampler/include /point_sampler.hpp'.

PointSampler/include
/point_sampler/importance
_resampling.hpp

PointSampler/include
/point_sampler.hpp
